

Project Name: Clarence Dock, Leeds

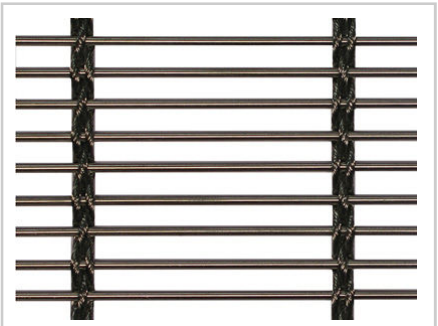

Architectural

**Gladstone 80/10 installed as car park cladding at Clarence Dock, Leeds.**

This architectural cable mesh was used to create a visually stunning and fire-resistant surface. The open area of the mesh creates a semi-transparent 'veil' effect which allows air to circulate freely.

Clarence Dock is a shopping and leisure centre in Leeds. It also has a large residential population in waterside apartments, and a significant number of business premises.

**Material:**  
Gladstone 80/10 Cable Mesh
